NOTES OF THE WEEK.

The mail steamer Australia may be looked for Monday next, en route for San Francisco.

Her Britannic Majesty's Ships Triumph and Opal will leave this port on Saturday for Esquimalt, British Columbia, as it is reported.

We are informed that H. R. M. S. Tigris will relieve the Opal on this station, although she is reported not to arrive for several days after the departure of the Opal.

There is considerable shipping in this harbor at present waiting for freight. Sugar is coming in slowly owing to the unfavorable weather, which prevents the schooners in the coasting trade from loading it at the other islands and bringing it to this port.

SIMLA RAILROAD.—We learn that the iron rails and all the other material for the Kailash railroad has arrived. Everything except the two locomotives will be on the ground in a few days. The locomotives will arrive in about ten days, however, and are expected to remain at Simla until the arrival of the two engines.

HOT CHOCO BAKERY.—Mr. Horn of the bakery, on Hotel street, will have on hand Friday morning the 11th inst. (Good Friday), an ample supply of the celebrated and famous Hot Chocolate Buns, sufficient to supply all demands, at 30 cents per dozen. See his advertisement in another column.

The arrival of the gate prevented the Ellisons from leaving Kalakaua at her proper time, which accounts for her non-arrival at this port on Sunday morning last. She arrived this morning and passengers by her report having experienced severe Weather on the passage.

The steamer Alaska had a steerage held on her shortly after her arrival, before discharge, and was decided to make the necessary repairs to enable her to resume her voyage to Hongkong. Messrs. Tibbets & Son have the work on hand, and will have her ready for service in a few days. She will sail for Yokohama and Hongkong on Saturday next, 12th instant.

The 11th inst. will be Good Friday, which will be observed as a holiday by authority, upon which occasion the day will be observed by appropriate religious services in the Episcopal and Roman Catholic cathedrals of this city. It is needful to advise our friends here that the anniversary of the crucifixion of our Savior will bring in among the most tragic event known to history.

The weather for the past week has been moderately warm with night light rains.

The trade has been good during all the week. We are pleased to learn that the rain has extended to the other Islands. On Maui, the rains have been quite heavy, bringing joy to the hearts of the planters and to the inhabitants generally.

Attention is called to a notice of a lecture to be given by Prof. W. D. Alexander, on Agriculture in Palestine, at the Lyceum on Thursday evening. The lecture will be given in aid of the American Fund.

The well-known abilities of the lecturer and the fact that he is recently from the country and source to describe will lend an additional interest to the subject and invest it with peculiar interest in so far as hands.

On Saturday evening last the Honolulu Library and Reading Room Association held a meeting, when the subject of procuring a charter of incorporation for the association was discussed. Final action was postponed, however, and another meeting will be held on the 11th instant.

A general attendance of persons interested in the association requested. This is an important matter to the future of the association, and we hope our people will give it their attention by their presence on Saturday evening.

We received a communication for publication from the "Labor Question" from Hon. Godfrey Rhodes, which was too late to appear this week, but will appear next week. We regard the "Labor Question" as important to any public question just now, and are pleased to see that it is being raised in such a prominent manner. Read it.

We commend to the prompt perusal of our readers the article of the Hon. W. G. Gibbs in the *West's Gazette*, as one of unusual merit and force of reasoning.

H. B. M. S. *Triumph*, the flagship of the squadron at this station, came into port on the 8th inst. Her armament consists of 10 12-ton guns, 4 6-pounds, and 6 20-pounds, and about 60 men. The following is a list of officers:

Admiral—Dr. Horner.
Captain—M. C. Raw.
Lieutenant—M. Raw.
Lieutenant—M. Corrington, 2nd Mr. Galloway, Dr. Mr. Fisher, Dr. Mr. Cooper, Dr. Mr. Fletcher, Dr. Mr. Hoyle, Foulkes Forster, and Mr. Smart.
Chief Engineer—Mr. Smart.
Paymaster—Mr. Davis.

The Royal Hawaiian Corps was in full blast on Sunday evening last, and had a full house. Under the direction of Mr. Loyal, gave us a good entertainment as he could. The absence of the band was a decided drawback to the performance, but that was partially made up by the efforts made by the performers to please the audience, which were applauded and applauded. Mr. Loyal stated in a speech to the audience (which was entertained by a large number of spectators) that he had a general audience of persons interested in the association requested. This is an important matter to the future of the association, and we hope our people will give it their attention by their presence on Sunday evening.
